

## Final Project Prompt

Your final is to create an original website using HTML, CSS + JavaScript. It must contain clean + heavily commented code, thoughtful + appealing design and a title.

You must create a webpage that acts as a project proposal slide deck. Your presentation slide deck should be built using the tool kit you intend to implement in your final.

Presentations should include your concept, design strategy, site map, wireframe and the library's methods/functions you intend research and implement in your project. Presentation and slide deck site are due in class on **Tuesday April 27**

Presentations + user testing days are mandatory. Everyone must participate, giving + receiving feedback. If you are remote - **please be in touch with me** as this will take the form of a one-on-one call.

## ##### Requirements

A design strategy including detailed wireframe of your home page (I will be looking for consideration of grid systems, thoughtful color selection, typography, user feedback, user experience, etc), responsive, etc. Each project must have a thoughtful title.

### \* Technical Parameters:

- \* Semantic HTML5
- \* Responsive CSS in an External Style sheet
- \* CSS Positioning and responsive design (use of flex and grid)
- \* CSS ids + classes
- \* At least 1 CSS Media Query
- \* JavaScript Interactivity
- \* Unique Images + Assets at an appropriate size
- \* Intuitive Navigation (if that's your jam)
- \* Posted to Your Github Server

### Original Content -

This should be a portfolio piece you can refer to after you graduate to showcase both your design + technical abilities (image-making is also a skill).

## ##### Time Line

Project Idea: **Thursday April 22**

Project Proposal Presentation + Slide Deck Site: **Tuesday April 27**

Code Studio + User Testing: **Thursday April 29**

Publish and submit a draft of your project: **Sunday May 2 at 6pm**

You will be assigned three (or more if you like) projects to user test remotely + comment on before Tuesday's in-class user testing + discussion.

Code Studio + User Testing: **Tuesday May 4**

Final Critique: **Thursday May 6**

Finished projects posted to the wiki: **Monday May 10 @ 11:59pm**
